IgniteOnsite from EmberOT:
THE GO-ANYWHERE OT ASSESSMENT & CYBER TOOLKIT

OT SECURITY ASSESSMENTS AND INCIDENT RESPONSE, WHEREVER YOU NEED THEM.

IgniteOnsite

Powering your industrial security Go Bag

## OT Cybersecurity Challenges:

- Limited visibility across distributed and air-gapped environments

- Inconsistent asset inventory and risk assessment processes

- Slow and complex deployments that hinder rapid response

- High costs and hardware dependencies with traditional solutions

- Compliance requirements that vary across industries and regions

PORTABLE.
SCALABLE. EFFECTIVE.

IgniteOnsite is EmberOT's portable assessment and cybersecurity bundle, built for OT consultancies, MSSPs, and incident response teams that need **rapid**, **scalable**, and **flexible** deployment across multiple environments. Designed with portability and efficiency in mind, IgniteOnsite combines EmberOT's powerful software-driven assessment tools with lightweight Ember sensors, delivering **actionable insights within minutes of deployment.**
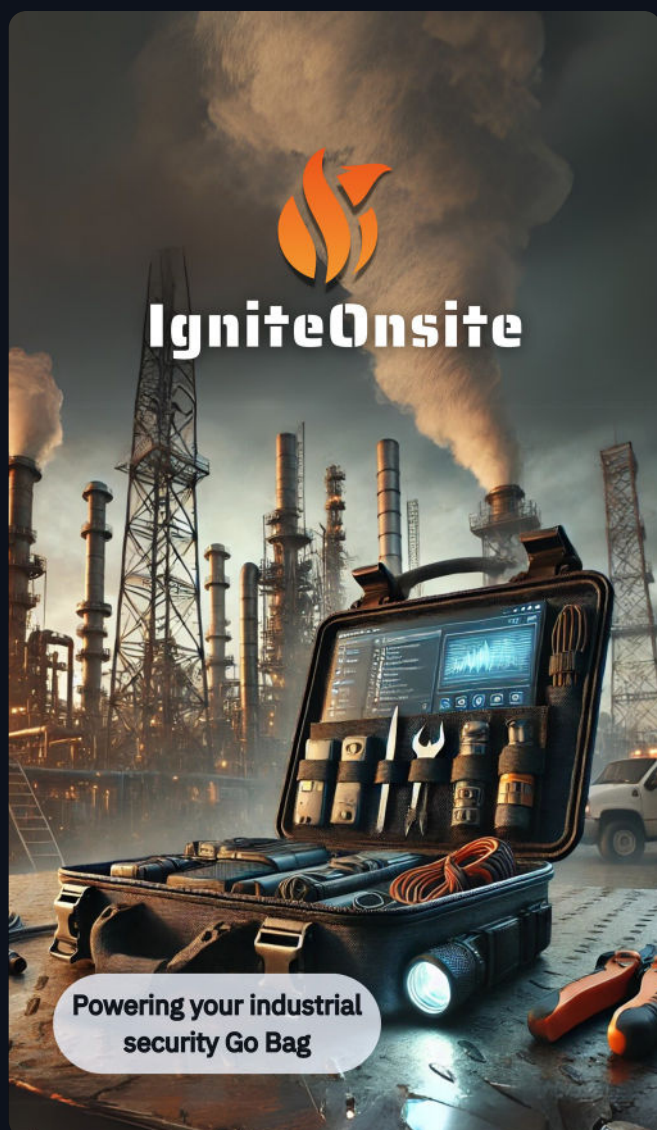

FLEXIBLE, POWERFUL, AND BUILT FOR OT SECURITY

DEPLOY ANYWHERE. RESPOND FASTER.

PORTABLE SOFTWARE & MULTI-SITE CAPABILITIES

- IgniteOnsite works on existing hardware, dedicated devices, or even a consultant's laptop. No bulky equipment is required.

- Deploy multiple Ember sensors across different segments or sites for fast, localized assessments.

UNIFIED VISIBILITY & AUTOMATED ASSESSMENTS

COMPREHENSIVE OT SECURITY TOOLKIT

- Automated asset discovery, vulnerability assessment, and threat detection, all in one unified platform.

- Streamlined data gathering ensures consistent, repeatable assessment results across engagements.

SECURE, OFFLINE, AND RELIABLE

PURPOSE-BUILT FOR INDUSTRIAL ENVIRONMENTS

- Designed for air-gapped and restricted network environments, and ideal for ICS and OT customers.

- Built on EmberOT's proven security technology, trusted by industrial cybersecurity experts.

EmberOT IgniteOnsite Benefits:

ADD VISIBILITY & REDUCE RISKS

- Real-time asset inventory and risk indexing

- Secure, lightweight sensors that rapidly integrate into OT environments

- Actionable insights aligned with incident response and compliance needs

IMPROVE INCIDENT RESPONSE & ASSESSMENTS

- Pre-packaged workflows and automation reduce assessment time

- Multi-site assessment capabilities for large-scale engagements

- Portable, software-driven approach eliminates hardware lock-in

REAL-TIME MONITORING & DEFENSE

- Continuous updates with the latest threat intelligence

- Air-gapped & offline-capable deployment options

- Seamless reporting & dashboard integration for faster decision-making

Take Action with EmberOT's IgniteOnsite

IgniteOnsite redefines portable OT cybersecurity. Whether conducting vulnerability assessments, asset inventory, security evaluations, or threat hunting, IgniteOnsite ensures OT security teams and consultants are always ready to secure industrial environments - anytime, anywhere.
